Guidelines for series approval of products for Electronic Games (Video)

Basic Configuration	Grouping as one series provided product has
Hand held with consumable non- rechargeable battery	 Same Power supply layout. Same chassis. Same power requirement and size / type of battery.
Rechargeable battery with external charging facility	 Same chassis. Same re-chargeable battery. Same Charger. Alternate models of charger to be tested. With the same electronic Game.
Mains operated with internal rechargeable battery	 Same mains layout or same SMPS board layout. Same enclosure except for differences of decoration parts. Same chassis. Battery to be treated as component (Alternate sources of battery may be evaluated as part of the main product.) Same processor / speed.
Mains operated - without battery	 Same mains layout or same SMPS board layout. Same enclosure except for differences of decoration parts. Same processor / speed.

Guidelines for Quantitative Selection of Samples

- A series may consist of 10 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
